

Kareem Walid Mabrouk

Software QC Engineer

✉ Kwalid.sw@gmail.com ☎ +201063697579 📍 Cairo – Egypt 🌐 [kareem-walid](#) 🔄 [Kareem-Walid](#)

🛡 Military Service: Completed

SUMMARY

- Software Tester transitioning from an embedded systems background (C, RTOS, MISRA) into Testing, with hands-on experience in **Manual**, **API**, and **Automation** Testing using Selenium, Playwright, and Python. Passionate about continuous learning - always exploring what's new in AI-driven QA and automation tooling.

EXPERIENCE

- **Software Tester Intern | Array; | July 2026 – Present**
 - Testing an LMS Project including (API Testing – SQL Testing)
- **SW Tester Freelancer | Tester Work – DIGIVNTE | September 2024 - July 2025**
 - Conducted QA testing for websites, apps, and video games across various freelance platforms.
- **DEPI Testing Train | MCIT | April 2024 – October 2024** 🔗
 - Learning ISTQB Foundation Level, Manual Testing (Write Test Cases, Bug Report and API Testing), Test Automation with Python.
- **ITI Summer Trainee (ARM) | ITI | Online | July 2023 - August 2023** 🔗
 - Mastered STM microcontrollers and HAL driver development for embedded systems.
- **Embedded SW Trainee | Sprints Associated with Udacity | July 2022 - September 2022** 🔗
 - Completed a 12-week intensive embedded software development program covering C, RTOS, microcontroller programming, SW Design, and MISRA standards.
 - Delivered a commended microcontroller-based final project.

EDUCATION

- **B.Sc. in Communication and Electronics Engineering (2019 - 2024)**
 - Al-Azhar University, Cairo - Egypt
 - Grade: Very Good
 - **Graduation Project:** Integration of ADAS (LKA – AI-Based ACC) | **Grade:** Excellent 🔗
 - Collaborated with a team of eight passionate and hardworking individuals, focusing on implementing ADAS systems that are increasingly present in every modern car.
 - Utilized FreeRTOS for real-time task scheduling and management across the ADAS system components

PROJECTS

- **Trello API Testing**
 - Test the API Request for Trello
- **EDF_Scheduler_FreeRTOS | Udacity | Aug 2022**
 - Implement Earliest-Deadline-First (EDF Scheduler) using FreeRTOS.
- **Moving Alarm Project | Ebdaa 11 | October 2022 - January 2023**
 - This project addresses the issue of oversleeping by implementing a small car that encourages the sleeper to chase it. The main idea is to stimulate the sleeper into action by making them run.

- **Student Management System using QUEUE | Mastering Embedded Systems | November 2023**
 - A C-based student management system using a queue structure that handles records with validated data entry and configurable institutional settings.

CERTIFICATIONS

- **ISTQB Foundation Level**

ONLINE COURSES

- The Complete Software Testing Bootcamp by Tarek Roshdy | Udemy | August 2026 [↗](#)
- Advanced Embedded Systems Nanodegree | Udacity | September 2022 [↗](#)
- ISTQB Foundation Level | Nezam Academy | 2024
- Selenium WebDriver with Java | 2025

TECHNICAL SKILLS

Manual Testing

TC Writing, Bug Reporting

API Testing

Postman

Automation Testing

Selenium

Core Concepts

Data Structure, Algorithms

Problem Solving

HackerRank 4th Star

Programming Languages

C, C++, Java, Python

Configuration Management

Git, GitHub

Methodologies & Concepts

OOP, Agile, Scrum, SDLC, POM

Database

MySQL

SOFT SKILLS

- | | | |
|-----------------------------|------------------------|------------------|
| • Productivity | • Problem Solving | • Self-Motivated |
| • Analytical Thinking: | • Self-Driven Learning | • Adaptability |
| • Functional Collaboration: | • Dedicated | • Collaboration |

INVOLVEMENT

- AZEX (Azhar Exhibition) | Head of Embedded Systems Track | October 2022 - May 2023
- AZEX (Azhar Exhibition) | AVR Technical Support Member | October 2021 - September 2022 [↗](#)
